# VoIP Solutions

## VoIP Gateways

VoIP Gateway bridges the gap between FXS, FXO, PRI, BRI, GSM, 3G, 4G LTE, and IP networks to reduce operating costs and deliver the convenience.

### GSM Gateway:

Integrated GSM/WCDMA/LTE connectivity and SIP protocol compatible with mainstream VoIP platforms, it is suitable for enterprises, multi-site organizations to enable easy & efficient communications.

### PRI Gateway:

It is a great respite for enterprises who are looking forward to lessen their cost of communication. Trunk/PRI gateway can also lead to minimization of maintenance costs.

### Analog Gateway:

VoIP gateways that seamlessly connect your analog phones, fax machines and legacy PBX with IP PBX systems and IP Phone networks.

### ATAs:

Protect your analog communication investment and create a high-quality and manageable IP telephony hybrid solution.
